

AETV-CG

SUBJECT: Enclosure 9 (V Corps NBC) to V Corps Command Training Guidance for FY03-04, Change 1

1. Reference. Equipment and crew certification procedures and detailed NBC training guidance is found in V Corps Regulation 350-4.
2. Commanders at all levels must insure that their soldiers and units are prepared to conduct operations under NBC conditions. To accomplish this vital mission involves training both individual and METL based collective tasks in an environment under NBC conditions.
3. Individual NBC training includes those essential soldier survival tasks as well as training operators to properly use and maintain all NBC equipment.
4. Collective training involves insuring you have the appropriate personnel identified and trained to perform NBC detection and monitoring, decontamination and control party warning and reporting.
5. To accomplish this training it is critical that each company sized unit have the appropriate number of personnel that have attended the two week NBC School. Units must not only conduct collective NBC training to mitigate the effects of NBC weapons but must include NBC training in all FTX situations and perform METL tasks while in the NBC environment.
6. V Corps POC is Shuplinkov, George MAJ (C5 Deputy Chemical Officer), DSN 370-5180.
